» **ELIMINATE**
Inefficiencies in the credit lifecycle

iKredit360

Limitless Credit Solutions. Built for a Boundary-less World

iKredit360 is a comprehensive and composable credit technology platform that enables financial institutions to curate unique credit experiences to merchants, channels-partners, and end consumers.

With its ability to converge multiple elements such as internal and external systems, financial products, credit lifecycle, and fintechs, iKredit360 empowers financial institutions to expand and extend their credit experiences to become the primary engagement point for their customers by offering both commoditised and specialised credit products across all business segments including Retail, Corporate, SME and Agri.

Financial institutions no longer need to tweak their process design to fit the product, instead, the platform can give wings to their strategic ambitions and design solutions that can wow their customers.

Why should Banks Choose iKredit360?

1 Era of the Specialist Systems

Traditionally, Lending solutions were packaged along with Core Banking systems, whose replacements were considered a massive transformation exercise for the FIs. **iKredit360 is an Asset 360 platform on the cloud that enables banks to curate bespoke credit experiences encompassing multiple channels, products, business segments, and fintech partners**

2 Shift from Product Pushers to Ecosystem Players

We are also witnessing the industry replace a traditional product focus approach with a more customer-centric one, leading to an ecosystem based product proposition in which credit/lending/consumer finance gets intrinsically wedded to the ecosystem where the finance is being offered. **iKredit360 will enable FIs to raise the bar from being just product pushers to relevant ecosystem players.**

3 Convergence of the Credit Lifecycle

Existence of information silos has become a harsh reality, resulting in disrupted customer experience. With standardization and democratization of technologies, there is a critical need to converge solution components. **iKredit360 is a seamlessly inter-connected platform that helps converge service delivery capabilities across the relationship lifecycle, irrespective of access channels or device form factors.**

360°

Unlock the Power of Convergence with iKredit360

With its ability to converge multiple elements in the ecosystem, iKredit360 empowers financial institutions to expand and extend their credit experiences to ensure a superlative experience for their customers:

Relationship Touchpoint
